Executive Summary

TSS aim to provide a well-coordinated gardening services using online bookings. This will offer small communities that cannot afford private contractors that charges huge amounts for just a simple service like trimming edges.

Projected total sales for the first year of operations are R823,200 sales are likely to increase at 10% annually for the period of five years. TTS anticipate to break even in the first year and gain profit in the second year and through the remainder of years

TTS market for online booking using geo-location technology with a smart pin-point accuracy will be growing at average rate of 10 percent markup annually, since none in the markets offers the same kind of technology for the smaller communities at the lowest costs. This make TTS to be amongst the first to combine the latest tech with untapped skills and resources that the man on the street can provide.

The potential clients/customer are:

1. Spruitview 2. Soweto 3. Vosloorus 4. Katlehong 5. Tembisa
6. Thokoza 7. New property development

TSS is committed in providing a specialized and tailored gardening service for each client's needs. TSS will meet all expectation and provide ongoing maintenance to the clients

The combination of skills TSS possess with the team management, advisory board, a web-site that ease-to-use, and the advantage of call a service with geo-location accuracy, will see the company on the market.

.

Business description

Tech trimmers (TTS) is a 100% privately-black-owned providing a Book-a-Gardening-Service. Created March 2018 as a Company PTY (LTD). TTS will be providing individuals and groups within the black communities looking for a fast effective way to request a garden service from the man on the street to a sub-contractor

Vision

Our vision is to provide home owners and garden service providers with state of the art technology that will be mutually beneficial and convenient

Our mission

“Smart technology that brings you garden services at a click of a button”

Management team

President: Vusi Levious Dhlamini; align business strategies, oversee business growth

Vice President: Ofentse Mogatle, Communication

Logistic Manager: Musa Dlamini; transportation, navigation,

Administration Manager: Cynthia Mokwena; Web-site operations, Customer Bookings.

Operations: Duduzile Buti, Banqobile Dhlamini, Thulani Khoza, Vusi Khoza.

Services

The platform that lets a home owners obtain a gardening service from the man on the street when they cannot do it themselves with an easy-to-use online web site, at the click of a button to book for a gardening service, using a GPS tracking customer location at the time the service is booked, when it was requested, where it's requested. TTS delivers how it's requested.

1. The customer who is the home owner will have to register their details on the Tech trimmer's website and create a username and a password.
2. Once registered, the customer will use the username and password to log into their profile.

3. This will require the customer to update their profile with an exception of mandatory entering the physical location (GPS) using the GPS – tool to track the location accurately for the customer or enter it manually.

4. This will render a full GPS coordinates that the customer will need to confirm for address verification. When the profile is updated and verified the customer will then be presented with a screen to select and request a service:

- Lawn trimming or cutting
 - Tree cutting or trimming
 - Garden maintenance
 - Garden cleaning
-
- Date of the service to be performed: 2018-03-17
 - Date expired: 2018-03-17
 - Estimated contractor/person time arrive: 12:00
 - Availability: Will someone be at confirmed location
-
- Additional instruction: Text message of 300 characters

Based on the customer location, type of service, and date and time a service is requested the system will automatically identify the garden service provider closest to the customer.

Then the system will issue a sms or whatsapp message to the selected contractor with an ID job made up of contractor number + Job ID + customer ID.

This will allow the contractor to accept the Job, reject or forward the Job to another contractor or person.

When a customer is having a gathering or a state property agent needs to take pictures to sell the property. This can be done online from a click of a button

Potential clients won't need to search through stacks of web site to find and call a gardening services, especially once they registered on Tech trimmer's web site.

Potential benefits for customers will be:

Ongoing service maintenance,

Growth in trust and relationship

Get promotions on new added services

Get one free service for every three call out or bookings.

Reduce time spent in doing their own gardening

Reduce costs by requesting a service that you don't have to look and wait for.

A service is one button click away.

Marketplace Analysis

Objectives

For the first 2 years of operations are to:

Create a trusted gardening services company who primary goal is to meet the customer expectations.

Obtain contracts for home owners in at least 30 to 50 residential homes

Increase the number of client serviced by 6% per year

Develop a suitable business, to be maintained by its own cash flow

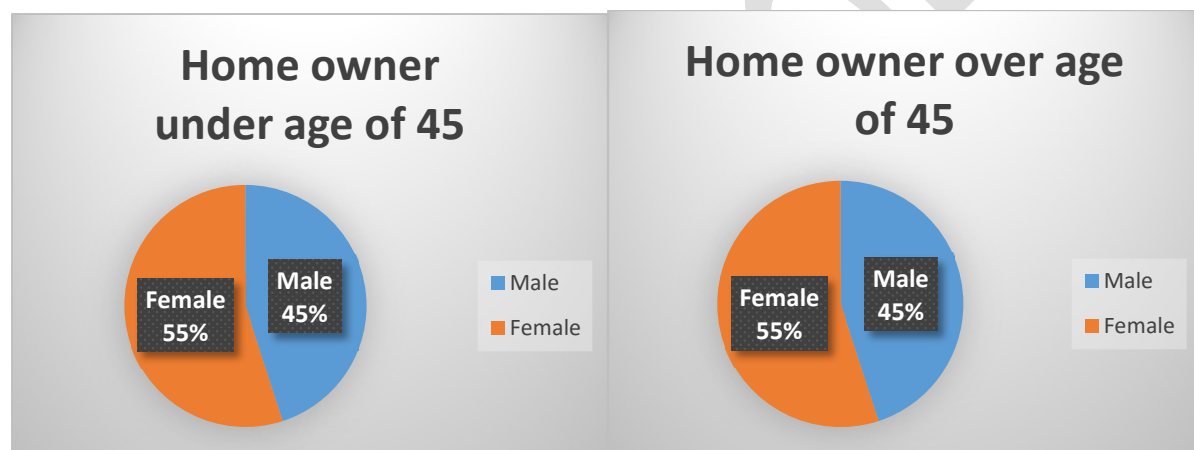

Target market

Spruitview, Soweto, Vosloorus, Katlehong, Tembisa

Thokoza, New property development Home Owners

Estimated number of houses that need garden services = 5500

The targeted market for home owners under and over the age of 45

This clearly indicates that the average of potential client base is likely to use computers and smart devices to access the internet

Competitors

Independent individuals who knock door to door to provide garden services

Privately owned professional services such as

“life green group”: <http://www.lifegreengroup.co.za/>

Services

Stylistic gardens

- Veld gardens (prairie gardens)
- Desert gardens
- English cottage gardens
- Rose gardens
- Modern gardens
- Mediterranean gardens
- Tropical coastal and sub-tropical gardens

- Desert gardens
- Japanese zen gardens

Restricted space gardens

- Exterior greenwalls
- Green roofs

Useful Gardens

- Vegetable gardens
- Healing gardens
- Medicinal gardens
- Water-wise gardens
- Scented aromatherapy gardens
- Frost resistant gardens

Environmental gardens

- Butterfly gardens
- Bird gardens
- Bee gardens
- Indigenous gardens
- Fynbos gardens

Strength

They cover a much larger variety of gardening services with experience and expertise

Weaknesses

They only focus in area of first-class high-societies communities leaving the middle and lower class community market untapped, exposed and underserved

“Cat Scapes Land Scapes ” <http://www.catscapeslandscapes.co.za>.

Services

- Managing water and drainage
- Drought Gardening
- Work with Weather
- Rose Pruning Time
- Container Gardening

Break-Even Analysis

Break - even point

Break-even in units = Fixed Costs/Contribution Margin per Unit

R9200.00 / R250.00 = 36.8 units

Fixed Costs = 9200.00

Rental = 2000

Telephone and Data = 1200

Salaries = 6000

Contribution Margin per unit = 250.00

Average cost per yard = 250.00

Break-Even point in Rands

R350 * 37 units = R12950

Total cost per yard = Cost per yard + 40%-mark up
= R250.00 + 100-mark up
Total Cost per yard = R350.00

Break-even point

Various Costs

Water and electricity = 1200
Travelling costs = 2000
Total Various Costs = 3200

Fixed Costs

Rental = 2000
Telephone and Data = 1200
Salaries = 6000
Marketing Costs = 800
Total fixed costs = 10000.00

Cost price per unit = 250.00 + 40%-mark up
Cost price per unit = 250.00 + 100
Total cost price per unit = 350.00

Break-even point formula in units = fixed costs/price per unit – Variable costs per unit

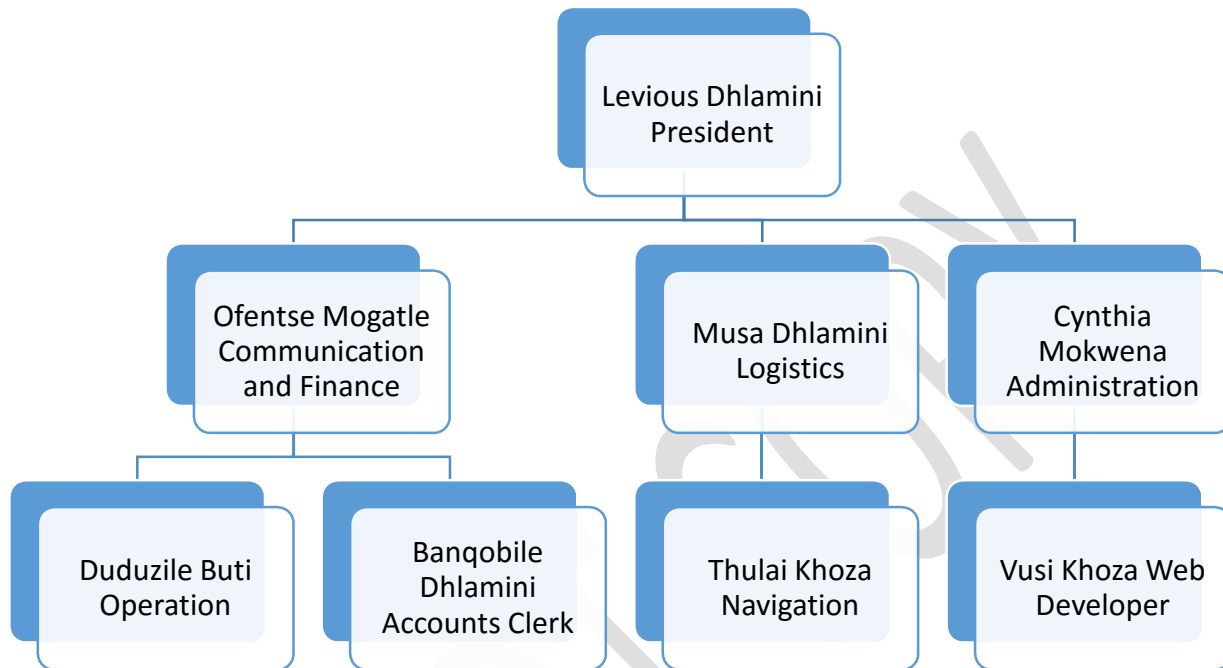

Units = $10000.00 / 350 - (3200/37 \text{ units})$
Units = $10000.00 / 350 - 86$
Units = $10000.00 / 264$
Units = 38

Break-even point in Rands

Total cost price per unit * total break even units = Break-even point in Rands
 $350.00 * 38 = R13300.00$
