Question 1

Tech Trimmers:

The need to book a gardening services from the man on the street when you cannot do it yourself

My business idea comes from a radical imagination being motivated by a group of individuals whom go from door to door requesting to perform a gardening services for a minimum fee as little as R100 to a maximum of R500. From a basic service like trimming and mowing the lawn to an advance service such as planting and removing existing trees, planting the lawn, trimming lawns, cutting edges, and cutting existing trees.

It got me thinking what if there's a booking website for such individuals who would really like for their services to be acknowledged and requested from a click of a button and the service is booked based on the community area they reside to possibly expand to other areas surrounding his/her community.

Often and most people in the black community do not have time for doing their own gardens and if they do get some time it's mostly use elsewhere this leaves the house exterior to look very undesirable.

At times those who have time for their gardens often do not do a very good job looking after it. This also introduces an opportunity in the market for some training if required or requested on how to properly maintain the garden or design gardens.

In most cases what makes it very difficult is to allocate or find such group of individuals around the black community to perform the services you require to do your gardening chaos in a short space of time.

The Idea is to introduce these group of individuals to the small e-market or e-business using a basic website together with a tool that uses a GPS location. 1

How it works is from the customer (person) to community in a specific area: 1

Will need to first register his/her details on the web site and create a username and password

Once registered the Customer (person) will use his/her Username and password login to his/her profile. 1

This will require the customer to update their physical address and physical location (GPS) using the GPS-tool to track the location accurately for the customer. This will render a full GPS coordinates that the customer will need to confirm for address verification. 1

When the profile is correctly updated the customer (person) will then be presented with a screen browser to request a service: 1

This will present other functionalities such as: 1

The type of service is required

- : Lawn trimming or cutting
- : Tree cutting or trimming
- : Garden maintenance
- : Space cleaning 1

Date of the service to be perform: 2018-03-17

Date expired: 2018-03-17

Time contractor or person to arrive: 12:00 Noon

Base on the customer location, type of service, and date and time a service is requested the system will automatically identify the contractor or person closest to the customer.

When the customer confirms the Job to be performed.

This will issue an SMS or WhatsApp message to the selected contractor with an ID job made up of contractor number+JobID+customerID. This will allow the contractor to accept the job, reject or forward the job to another contractor or person.

Network Effect

Social media – Facebook

By creating a Facebook page dedicated to company services, that will seek other meetup group with the function and interests about the beauty of their garden yards.

Business cards

This is another powerful tools to reach out and let people know about my business

Printing T-Shirt that stands out with enough information about the company Website

Word-of-Mouth

When you share a story through friends and family and their friends and their families the number multiplier exponentially about my company and what it's about

Fliers

By compiling a catalogue that will be distributed around the black communities with graphic pictures with the service the business will supplier. ↗

Direct email

Reaching other organization like government, enterprise, hospital, schools, and private-owned-property.

Scalability

The company web site is expected to attract about 50 customers in the next 3 months and equally attract 20 contractors ranging from a man on the street who has the same skills to offer around the same area or community. This number of can easily grow to other areas to attract about 500 customers to 100 contractors or individuals within a year can be spread from 1 community to multiple communities.

First Mover advantage

One has to take note and great consideration that this type of booking service entering the online business has never been exploited amongst black communities. This attract and promotes community relationship and responsiveness

Adaptability to change

By adding and offering more services to exploit and contracts other professional companies such as Landscaping, Flouriest, green planet (tree planting) for schools, community and organization

Question 2

Vision

Our vision is to provide customer satisfaction by being exceptional in meeting and exceeding customer expectation.

"Dare to dream anything is possible when you believe"

Future added services:

- 1 Training (Customer how to maintain the garden)
- 2 Provide the same service to other sectors in the market:
 - Organization

- Schools
- Hospitals
- Government
- Hotels
- Privately-owned Rental property

Each services booked or requested a 10% profit will be generated towards the business unit.

Do-a-gardening-service

Based on the automated system that Tech Trimmers will be developing a contractor will be selected based on the area (GPS) location around or near the closest to customer(s).

Customer benefit

Reduce time spend in doing their own gardening

Reduce costs by requesting a service that you don't have to look and wait for.

A service is one button click away.

The customer can use a smart phone to book a service on the web site as the web-site is scalable to all the portable devices

Pictures of Services offers:

This offers a range of equipment use to mow the lawn

This can be adjusted to a perfect trim from a fine trim to a carpet trim.

Gliding with ease around those edges, a perfect trim with a straight line.

The size of the lawn really no sweat done with ease

Look at this trim perfection trees are well trimmed flowers follow the line trimmed based on the walking pavement

Question 5

Social Network (Facebook)

This is a free advertising platform which can have a powerful outcomes and a great impact to Tech Trimmers. Looking at the local and national contests to enter within the same field to boost the customer relationship.

Creating a Facebook page that will be dedicated to Tech Trimmers this will increase the network effect leading to scalability of the business. The Facebook page will do garden views, reviews, updates about the latest trends and styles on how to maintain your garden, latest technology trending in gardening. Create homemade videos about what service the Tech Trimmers offers.

By joining a Facebook page that consists of meetup group of gardeners opens up the opportunity to meet the local residents whom value the function and beauty of their yards.

Statistics

About 74% of ages between 16 to 35 years of age access Facebook each day which opens up a vast market to spread my E-business

36% usage of Facebook is the Organization, schools, and hospitals

By constantly updating the Facebook page I keep Tech Trimmers trending, relevant, current, innovative, challenging and competitive.
